

Landscape By Aden Goodman

**The fancy landscape, overlooking all the plants
Like cacti with tiny or big needles
Or The Jimson Weed plant, which is very toxic
But either way, nature always shows off
With mountains, valleys, canyons, flora, and fauna
Animals look for plants or animals, maybe both
Trees and cacti are all growing, with fruits growing
Flowers decorate lush fields with color
Hummingbirds fly around, pollinating flowers
As birds fly, patterns fill the sky
Bees also fly around, pollinating flowers
Also making sweet honey for cooking
Gray foxes wrestle each other
Stingrays race each other through the Gulf Of
California
Making the Sonoran Desert a beautiful place
Especially in the springtime**
