

ARIZONA-SONORA DESERT MUSEUM
PLANT CARE INFORMATION

Triangle-leaf Bursage
Ambrosia deltoidea

DESCRIPTION: A low, woody perennial shrub commonly found in the Arizona-upland portions of the Sonoran Desert (the hills from Tucson and Phoenix, west to the Colorado River). In this habitat, it is one of the cornerstone plant species, acting as nurse-plant for many other plants. The triangular gray-green foliage can become deciduous in drought conditions. Triangle-leaf Bursage will grow to around 2' tall and 3' across.

RECOMMENDED USE: Great for an enhanced desert landscape or xeriscape, and for revegetation projects.
